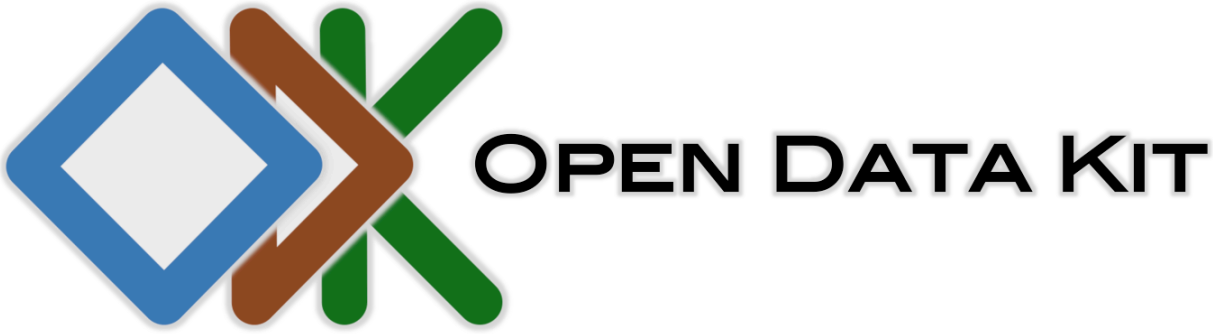
Welcome



This is the website for *A Guide to Data Collection Using Open Data Kit*. This book is built in R using `bookdown` package. Visit the GitHub repository for this site to view the source code for book and if you want to build your own copy of the book.

Introduction

Open Data Kit (ODK) is a free and open-source set of tools which help organizations author, field, and manage mobile data collection solutions. **ODK** provides an out-of-the-box solution for users to:

- Build a data collection form or survey (**XLSForm** is recommended for larger forms);
- Collect the data on a mobile device and send it to a server; and
- Aggregate the collected data on a server and extract it in useful formats.

Chapter 1

Getting started with ODK
